- Tooling: Git, Astro, Vite, React
- Figma, Adobe XD, Adobe Creative Suite

ABOUT ME

"Designing and developing seamless user experiences."

I'm a Frontend Developer and UX/UI Designer with a background that blends creativity and technical precision. After graduating from the Estonian Academy of Arts, I transitioned from creative direction and project management into frontend development, where I now design and code full UI systems from the ground up. I focus on building accessible, responsive, and maintainable interfaces - combining strong visual design with clean, efficient code to create intuitive user experiences. Portfolio available upon request.

EXPERIENCE

ERPLY Development OÜ Frontend Developer, UX-UI

21.08.2023 – current

- Designed and developed a modular UI library and design system for ERPLY's retail platform.
- Built a token-based theming system supporting light and dark modes.
- Designed and coded reusable frontend components - including navigation, modals, alerts, datepickers etc - using HTML, CSS and vanilla JavaScript for clean, scalable architecture.
- Developed a unified responsive menu framework that functions as both a sidebar and top navigation, implemented with Go templates to support ERPLY's platform structure. This flexible base enables developers to reuse the same menu system across multiple apps with different requirements.
- Conducted UI reviews across product teams to improve consistency, accessibility, and visual alignment with the shared design system.

Typesetter OÜ Creative / Project Manager

2019 – 2023

- Curated visual concepts for different projects.
- Created illustrations, moodshots, package design.
- Front-end development, WordPress, and PHP.

Health RCM Certified Medical Coder, Compliance Team Lead

2013 – 2023

- Worked with different software (Mdl and iClinic®, eClinical-Works).
- Helped improve and test our company's own software.
- Lead compliance team and was responsible of quality assurance audit.
