ABOUT ME

Product-focused engineer combining software development, UX/UI and AI-powered product experience. I turn business and user needs into clear digital solutions and work across product definition, implementation and delivery.

EXPERIENCE

Edicy OÜ (ERPLY)

2023 – Present

Product Engineer · Product Ownership & UX/UI

- Owned product features from early requirements and user needs through UX decisions, implementation, testing and production release.
- Designed and developed AI-powered Email Marketing and Social Media products, including content generation, campaign management, publishing, analytics and automation.
- Defined complex product workflows for campaign creation, contact management, scheduling, analytics and automated processes.
- Translated business and user needs into functional product requirements, interaction flows and production-ready solutions.
- Designed and developed ERPLY's modular UI library and shared design system.
- Built a unified responsive navigation framework used across ERPLY applications.
- Developed reusable frontend interfaces using HTML, CSS, JavaScript, TypeScript and Go templates. Contributed to Elektrilevi's customer information and billing system, improving usability and customer-management workflows.

Selected products:

[FLAX Hospitality POS](#)

[Email Marketing](#)

Typesetter OÜ

2019 – 2023

Creative / Project Manager

- Managed projects from client requirements and concept development through delivery.
- Coordinated priorities, timelines and stakeholders across creative and technical work.
- Contributed hands-on to digital solutions, including frontend, WordPress and PHP.

Health RCM

2013– 2023

Certified Medical Coder (AAPC CPC, CRC), Compliance Team Lead

- Led a compliance and quality assurance team in a regulated healthcare environment.
- Coordinated audits, quality processes and workflow improvements across the team.
- Worked with internal software tools and healthcare platforms, contributing to usability and process improvements.
